MVD Communications Transitions Indianapolis Cabling Business to Apachi Networks

CINCINNATI, Ohio – April 11th 2006 - MVD Communications LLC, one of the region's top telecommunications service providers, announced today it is transitioning its Indianapolis cabling business to Apachi Networks. This allows our Indianapolis office to focus and expand on our core strengths—providing and supporting tailored IP telephony systems and Call Center solutions to our customers.

“MVD will continue to provide our customers with a total solution which requires a best-in-class cabling infrastructure partner and Apachi Networks is that partner,” said Lance Carlton, MVD Director of Professional Services. “We are working closely with Apachi Networks to ensure that this transition is seamless for our customers.”

MVD is currently working on the transition of its existing Indiana cabling business and employees to Apachi Networks. The completed agreement is expected to be complete by the end of April 2006.

About MVD Communications

MVD Communications is a Cincinnati-based company that provides voice and data network applications for small and large businesses nationwide. Key offerings include telephone systems and voicemail, data networking and design, remote monitoring, customized maintenance and support, and managed services. With regional offices in Florida, Indiana, and Ohio, MVD supports and maintains solutions from such industry leading manufacturers as Avaya, Mitel and Siemens.
